EDUCATION

Indira Gandhi Delhi Technical University for Women
B.Tech CSE-AI
CGPA - 9.13

2023 – 2027
Delhi

Dev Samaj Modern School
Senior Secondary
91%

2020 – 2022
Delhi

SKILLS

Technical Skills

- Programming Languages:-Java
- Libraries:-Tensorflow, Numpy, Pandas,Scikit-learn, matplotlib
- CS Fundamentals:- OOPS, DBMS, DSA, OS, CN

Soft Skills

- Leadership
- Communication
- Time Management
- Presentation

EXPERIENCE

CV-DL Intern | IGDTUW

06/2024 – 07/2024

- Completed a **8** weeks internship Gaining expertise in image processing, CNNs, advanced architectures (ResNet, YOLO), object detection and segmentation
- Co-authored a comprehensive research paper outlining the project's methodology and key findings, detailing implementation strategies
- Developed a project classifying **9** types of skin cancer using deep learning.

Research Intern | DRDO

06/2025 – 10/2025

Institute for System studies and analyses (ISSA)

- Performed automated pixel-level classification on the DeepGlobe dataset, achieving **~75%** preliminary accuracy.
- Conducted extensive data filtering and exploratory analysis on high-resolution remote sensing imagery and object-level dataset creation with **800+** samples.
- Developed a multi-model pipeline integrating CNNs, K-Means, and pre-trained networks; evaluated feature-wise and model-wise accuracies for defense-oriented target recognition.

PROJECTS

Treatment Intel | NLP, FastAPI, MongoDB | [🔗](#)

02/2026 – Present

- Developed an AI-powered treatment intelligence platform that analyzes and compares medical therapies using patient review data.
- Built an NLP pipeline for sentiment analysis, emotion detection, side-effect extraction etc. from online treatment discussions.
- Designed a modular FastAPI + MongoDB backend separating ML inference from APIs for scalable, real-time analytics.

Smart Kisan | Python, CNN, XGBoost, HTML | [🔗](#)

05/2025 – present

An integrated solution to assist farmers with crop decisions, using AI and real-time data.

- Engineered a CNN pipeline with **85% accuracy** for automated plant disease diagnosis
- Designed an XGBoost-based crop recommendation system with **90% accuracy** to optimize yield.
- Offers personalized fertilizer suggestions, weather, and information on government schemes.
- Built a responsive web interface, ensuring accessibility and ease of use for rural users.

ACHIEVEMENTS

Reliance Undergraduate Scholar

09/2023 – present

Selected as one of the top **5000** applicants for the scholarship from **50000+** applicants

Research Paper Accepted-ACDSA 2026

11/2025

Paper titled “*Comparative Analysis of Land Use Land Cover (LULC) Classification using Supervised, Unsupervised, and Deep Learning Methods*” received acceptance after peer review.

Innerv (AIT Pune) – Runner Up [🔗](#)

01/2026

- Architected **TechIntel**, a Knowledge Graph–driven scientific intelligence platform, earning **2nd place among 10,000+ participants** in a national-level hackathon.
